

List of U.S. Exhibitors at K'2004 as of February 2004

Bamberger Polymers, Inc.

Jericho, NY

Products: Bamberger Polymers is a global distributor of plastic resins for molders, extruders, compounders etc.

Batelle Memorial Institute

Columbus, OH

Products: Batelle targets renewable resources and R&D 100 awards

CMAI - Chemical Market Associates, Inc.

Houston, TX

Products: CMAI is a plastics and polymers consultant providing online information and reports on historical and forecast economic data, prices etc.

Commodore Machine Company

Bloomfield, NY

Products: Commodore Machine Company is a single source supplier of equipment for the production of expanded polystyrene foam trays (EPS). From material handling systems to extruders, thermoformers to quality control, training and more.

Conforma Clad, Inc.

New Albany, IN

Products: Conforma Clad offers tungsten carbide for twin screw extruder barrels and liners for the plastics industry. Conforma Clad offers a thin, tough layer of dense tungsten carbide in a nickel-chrome-boron matrix for the hardest, toughest wear protection available.

Cool Polymers, Inc.

Warwick, RI

Products: Cool Polymers manufactures thermally conductive injection molding grade compounds based on engineering and commodity plastics. It also assists customers in design, prototyping, testing, tooling and high volume injection molding.

Custom Polymers

Houston, TX

Products: CPI is a recycler and a reprocessor of post-industrial plastic waste. Firm is specialized in setting up recycling programs for manufacturers generating plastic scrap, providing long-term recycling solutions while customizing each program to meet the individual needs of client.

Draiswerke, Inc.

Mahwah, NJ

Products: Draiswerke offers advanced milling technology, compounders for plastic compounding processes and the Turbulent Super Flusher revamped the technological process of pigment flushing.

DT Converting Technologies (Sencorp)

Hyannis, MA

Products: DT Converting Technologies offers thermoforming machinery, blister packaging systems, laboratory sealing systems, rotary compacting presses and machine build to print for consumer items, appliances, electronics, construction, hardware, cosmetics, food, toys, automotive accessories and other products.

Emerson & Cuming, Inc.

Canton, MA

Products: Emerson & Cuming offers syntactic foam, the preferred plug assist material from the original manufacturer of syntactic materials.

Enercon Industries Corporation

Menomonee Falls, WI

Products: Enercon produces a complete line of surface treating equipment for printing, converting, packaging, from narrow web to ultra-wide web corona treating equipment (bare roll, covered roll, universal roll), plasma surface treaters and 3-dimensional surface treaters as well as water-cooled induction cap sealing systems for packaging, .

Gain Technologies

Sterling Heights, MI

Products: GAIN Technologies is a pioneer in gas assist injection molding, including turnkey gas assist injection molding equipment.

Greater Akron Chamber

Akron, OH

Products: The Greater Akron Chamber represents information on Greater Akron region and firms located herein.

IBA - Advanced Materials

San Diego, CA

Products: IBA Advanced Materials specializes in the application of radiation processing technologies, specifically electron beam, gamma and X-ray, to industrial products and materials for the purpose of improving product performance and reducing costs.

Kenrich Petrochemicals, Inc.

Bayonne, NJ

Products: Kenrich's titanate, zirconate and aluminate coupling agents provide a metallocene-like catalysis of unfilled polymers for faster injection & blow molding at lower temperatures while making the polymer stronger; adhesion promotion; and dispersion of fillers and pigments. Firm also offers antistatic agents based on patented combined trineoalkoxy zirconates.

Mattec Corporation

Loveland, OH

Products: Mattec Corporation provides real-time production and process monitoring systems for selected industries. The company was started for the purpose of creating a real-time shop floor monitoring and data acquisition system, including the appropriate software.

Maxi-Blast, Inc.

South Bend, IN

Products: Maxi-Blast offers non-abrasive plastic blast cleaning media. The plastic media are used by rubber and plastic molders for deflashing parts and cleaning molds, dies, and extrusion screws.

McClarin Plastics Inc.

Hanover, PA

Products: McClarin Plastics has developed a solutions approach to business involving the development of new technology. Firm's manufacturing facilities provide thermoplastic and composite components processed by thermoforming, pressure forming, resin transfer molding, and bag molding.

Modern Dispersions Inc.

Leominster, MA

Products: Modern Dispersions is a compounder of thermoplastic materials. Products offered include a wide variety of concentrates and compounds. With state-of-the-art compounding equipment, MDI has the ability to process a wide range of polymers and additives.

Northeast Ohio Trade & Economic Consortium

Kent, OH

Products: The Northeast Ohio Trade & Economic Consortium represents information on Northeast Ohio and firms located herein.

O.A. Newton & Son. Co.

Bridgeville, DE

Products: O.A. Newton provides material handling solutions, from replacement parts to complete manufacturing facilities, for companies throughout the world. The highly qualified technical team offers in-depth knowledge of the process industries.

Pantone Inc.

Carlstadt, NJ

Products: The Pantone Plastics Color System provides a standard language for color communication between designers and manufacturers of plastic goods.

Pelletizer Knives, Inc.

Houston, TX

Products: Underwater pelletizing knives used in the production of polypropylene and polyethylene.

Pelletron Corporation

Lancaster, PA

Products: Pelletron offers dedusting equipment, components, elbows. The Deduster efficiently removes fines, fluff and streamers (formed during transport through pneumatic conveying systems) through its state of the art design that disrupts the electrostatic bond formed between pellet and contaminant.

Plaskolite Inc.

Columbus, OH

Products: Plaskolite, Inc. offers a full line of acrylic sheet products that are appropriate for a number of industrial applications, including point-of-purchase displays, sign fabrication, automotive accessories, picture framing, building materials and skylight fabrication.

Plastics Fabricating & Forming Magazine

Stafford, VA

Products: PFF provides latest news items, new products and services in the industry, latest business trends and profiles on aspects of the assembly process of plastics.

Plastics Technology Magazine

New York, NY

Products: Plastics Technology Magazine was designed to equip processors with the technical data they need to run their plants more efficiently.

Reduction Engineering

Kent, OH

Products: Reduction Engineering provides all the size reduction processing equipment, including a complete range of ambient and cryogenic state-of-the-art pulverizing systems for the rotational molding and rigid PVC recycling ranging from Strand, Water Slide and Pultrusion Pelletizer Systems.

Reedy International Corporation

Keyport, NJ

Products: Reedy creates and produces advanced thermoplastic additives for the injection and extrusion industries, micro fine special effect colorants, extrusion processing equipment, mixing nozzles, purging compounds, adhesives, gas metering and injection systems.

Rennco Inc.

Homer, MI

Products: Rennco offers uniquely designed constantly heated, coated seal bar which provides a smokeless, odorless, low-maintenance sealing system. Rennco markets and sells its packaging machinery and systems through domestic and international distribution programs and works directly with manufacturers of food service disposable products.

RJG Technologies, Inc.

Traverse City, MI

Products: RJG is a solutions company that works with injection molding companies throughout the world to devise strategies for improving productivity, reducing scrap, increasing quality, and maintaining efficiency of the process as well as production control for injection molded parts.

Shuman Plastics Inc, Dyna-Purge Division

Depew, NY

Products: Dyna Purge offers the high-performance Dyna Pure ® purging products. Firm states that its products have a natural flow throughout the barrel of the

processing equipment: softening but never completely melting. These thermoplastic compounds loosen carbonized and degraded resin, as well as color, flushing away impurities. Dyna Purge ® reduces changeover time, scrap and will increase productivity.

State of North Carolina

Products: The State of North Carolina represents information on its region and firms located herein.

The Shepherd Color Company

Cincinnati, OH

Products: The Shepherd Color Company's pigments are highly engineered ceramic colorants. They are impervious to sunlight, chemicals, and thermal attack. They are compatible with not only widely used polymers, but also the most exotic, difficult-to-formulate systems. Their extreme inertness defends against migration from plastics or coatings, and helps to ensure environmentally sound, non-toxic formulations.

The Society of The Plastics Industry, Inc (SPI).

Washington, DC

Products: SPI is the U.S. Association for the Plastics Industry and organizer of all major plastics trade shows in North America, one of them being the National Plastics Exposition (NPE). At K' 2004, it will also provide information on the next NPE scheduled for June 2006.

Thermetic Products Inc.

St. Louis Park, MN

Products: Thermetic Products manufactures heating elements for plastics machinery.

West Virginia - Polymer Alliance Zone

Ripley, WV

Products: Develop and promote the Polymer Alliance Zone in order to attract and expand the polymers industry in the world.

Wilmington Machinery

Wilmington, NC

Products: Wilmington produces custom-tailored compound- and co-injection molding machinery. It teams with companies of all sizes as well as entrepreneurs to make bold, original processing ideas a reality with superior customized machines.

Zeiger Industries

Canton, OH

Products: Zeiger produces Mallard ® Non-Return Valves, hardened tool steel screws, barrel end caps and shut-off nozzles.
